

**REMARKS**

The present Amendment is submitted under the provisions of 37 CFR 1.312. It is requested that the Amendment be entered since it is necessary for proper protection of the invention and it will not require any substantial amount of additional work on the part of the Examiner.

The amendment to the specification is presented in order to correct an inadvertent typographical error. Specifically, the incorrect term “methy” has been replaced with the correct term “methyl”. This correction is obvious to one skilled in the art, and therefore, does not add new matter to the application.

Further, the amendments to claims 6 and 16 are also presented in order to correct inadvertent typographical errors. Specifically, “ethylene methyl acrylate” has been replaced with the correct term “ethylene methyl methacrylate”. Support for the amendments can be found on page 5, lines 5-7, and page 12, Table 1, line 4 from the bottom. Therefore, the changes do not add new matter to the application.

Additionally, the changes will not require any additional search or examination by the Examiner. Therefore, the claims remain patentable for the original reasons of allowance.

It is respectfully requested that the present Amendment be entered.

Respectfully submitted,

Sadanobu SHIRAI

/Amy E. Schmid/
